

## **I Applications**

The INNOVA S-type valve is a pneumatic shut-off double seat valve for hygienic applications. The leackage chamber, under atmospheric pressure, situated between the two seats ensures a safe interface between the two liquids, one of which is usually a CIP solution (cleaning agent).

The leakage chamber is cleaned via the CIP nozzle situated in the lantern.

### I Design and features

Hygienic design according to EHEDG.

No leakage during the opening/closing of the valve.

Balanced lower seat.

Single-acting pneumatic actuator.

Easy assembly/disassembly of internal parts by loosening a clamp fastener.

Open lantern allows visual inspection of shaft sealing.

360° adjustable body.
